Feature: Product and Stock Management

As a workshop manager
I want to manage the product catalogue and stock
So that I can track parts and materials for service orders

Scenario: Successfully register a product

- ✓ **Given** no product is registered with code "PRD001"
- ✓ **When** I register a product with code "PRD001", description "Óleo sintético 5W30 1L"
- ✓ **Then** the product should be created successfully
- ✓ **And** the product code should be "PRD001"

Scenario: Reject duplicate product code

- ✓ **Given** a product already exists with code "PRD001"
- ✓ **When** I try to register another product with code "PRD001"
- ✓ **Then** the operation should fail with a conflict error

Scenario: Find product by code

- ✓ **Given** a product already exists with code "PRD002"
- ✓ **When** I search for product with code "PRD002"
- ✓ **Then** I should receive the product data

Scenario: Return not found when code does not exist

- ✓ **Given** no product is registered with code "UNKNOWN"
- ✓ **When** I search for product with code "UNKNOWN"
- ✓ **Then** the operation should fail with a not found error

Scenario: List all products

- ✓ **Given** a product already exists with code "PRD010"
- ✓ **And** a product already exists with code "PRD011"
- ✓ **When** I list all products
- ✓ **Then** the product list should contain 2 products

Scenario: Add stock to a product

- ✓ **Given** a product exists with code "PRD003" and stock "100"
- ✓ **When** I add "50" units to product "PRD003"
- ✓ **Then** the stock should be "150"

Scenario: Deduct stock from a product

- ✓ **Given** a product exists with code "PRD004" and stock "100"
- ✓ **When** I deduct "30" units from product "PRD004"
- ✓ **Then** the stock should be "70"

Scenario: Fail to deduct when stock is insufficient

- ✓ **Given** a product exists with code "PRD005" and stock "5"
- ✓ **When** I deduct "20" units from product "PRD005"
- ✓ **Then** the operation should fail with insufficient stock error

Scenario: Find low stock products

- ✓ **Given** a low stock product exists with code "PRD006"
- ✓ **When** I list low stock products
- ✓ **Then** the product list should contain 1 products

Scenario: Update product description

- ✓ **Given** a product already exists with code "PRD007"
- ✓ **When** I update product "PRD007" with new description "Updated description"
- ✓ **Then** the product should be created successfully

Scenario: Delete product by code

- ✓ **Given** a product already exists with code "PRD008"
- ✓ **When** I delete product with code "PRD008"
- ✓ **Then** the product should be deleted

Scenario: Fail to delete non-existent product

- ✓ **Given** no product is registered with code "NOT_FOUND"
- ✓ **When** I delete product with code "NOT_FOUND"
- ✓ **Then** the operation should fail with a not found error
